

Addison Hagan

Frontend Software Engineer | React | Next.js | TypeScript | Tailwind CSS

addisonhagan92@gmail.com | +1 (410) 979-5667 | Annapolis, Maryland | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Frontend Software Engineer with hands-on experience building modern web applications in React, Next.js, and TypeScript. Shipped production frontend features at Skinstric AI, taking work from Figma handoff through to deployment on Vercel. Builds full-stack projects with Firebase, MongoDB, and REST APIs, with a focus on responsive design, reusable component architecture, and performance. Currently completing computer science coursework while deepening testing and advanced TypeScript skills.

Technical Skills

Languages & Web: JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS

Frameworks & Libraries: React, Next.js, Redux, Zustand, React Query, React Hook

Form, GSAP **Backend & APIs:** REST APIs, Firebase, MongoDB, Supabase, Stripe,

Authentication, OpenAI API **Tools & Platforms:** Git, GitHub, Vercel, Netlify, Vite, Figma,

Postman, Jest, React Testing Library **In Development:** Advanced TypeScript patterns,

system design, CI with GitHub Actions

Experience

Skinstric AI (Remote) Jun 2026 - Jul 2026 *Frontend Developer Intern*

- Shipped production-ready frontend features for an AI skin analysis platform using Next.js, TypeScript, and Tailwind CSS, from Figma handoff to live deployment.
- Integrated the OpenAI Vision API into a responsive multi-step analysis workflow covering onboarding, camera capture, image upload, and AI-generated results.
- Built a custom GSAP animation system for loading and analysis states, improving perceived performance during processing and lifting user retention.
- Optimized performance with Next.js Server Components, achieving sub-2-second response times for skin condition analysis.

Parking Management Company (Annapolis, MD) Jul 2024 - Present *Guest Service Coordinator*

- Coordinate real-time vehicle flow and guest requests during peak hours in a fast-paced valet operation; recognized as Employee of the Month for communication, reliability, and problem-solving under pressure.

Projects

CodeCritic AI | [Live Demo](#) | [GitHub](#)

- AI code review platform built with Next.js, TypeScript, and MongoDB: structured analysis, scoring, and persistent review history.

Incident Dashboard | [Live Demo](#) | [GitHub](#)

- Real-time incident management dashboard using Next.js, TypeScript, MongoDB, and Socket.IO: live cross-client updates, status workflows, and data persistence.

Ultraverse NFT Marketplace | [Live Demo](#) | [GitHub](#)

- Modern NFT marketplace in React and Next.js: collection browsing, dynamic routing, reusable components, and fully responsive design.

Education

Frontend Simplified Engineering Institute Oct 2025 - Jul 2026 *Frontend Engineering Certificate, 3.9 GPA*

Anne Arundel Community College (Arnold, MD) Aug 2024 - April 2026 *Computer Science coursework toward*
